

Adding Screenshots to iWeb

You may wish to take screenshots of projects in applications such as Pixie, KidPix or Kidspiration. To take a picture of part of your screen,

1. Press the Shift+Command+4 keys.
2. The cursor turns into a .
3. Click and drag from the upper left most portion of your screen to the lower right most portion of your screen that you want to capture.
4. The screenshot will appear on the desktop and will be labeled "Screenshot"+the date and time.
5. This picture file can be dragged anywhere onto your blank, photo or album iWeb page, and can be sized by grabbing the handles.
